

UNIGLOBE CREDIT TRACKING

Introducing another great tool from Travel Management Experts at UNIGLOBE Travel - UNIGLOBE Credit Tracking

With the advent of e-ticketing and the growing availability of highly competitive one-way fares online, most corporations are finding it increasingly challenging to identify, track and maximize the use of unused ticket credits. With no formal record of credits created or used, corporations are finding that they have no reliable internal process nor in many cases, do their travel service provider. Even when the travel supplier does offer to get involved their own internal process is often based on manual intervention and the memory of an assigned agent. With these challenges in mind and given the fact that corporations can easily experience up to 20% lost ticket value of their total travel spend based on the expiry of unused credits, UNIGLOBE Travel has developed and industry leading solution – UNIGLOBE Credit Tracking.

What is UNIGLOBE Credit Tracking?

This innovative solution relies on database technology to remove the typical manual intervention of an agency to create the record of a credit. Then when an applicable reservation is requested the system creates an automated prompt for your UNIGLOBE Counsellor to redeem the credit.

The information captured by UNIGLOBE Credit Tracking includes all outstanding credits, all used credits and their expiry dates. This data is housed in a web-based environment that can also be accessed by the client via an assigned SECURE login.
